

Portainer 소개

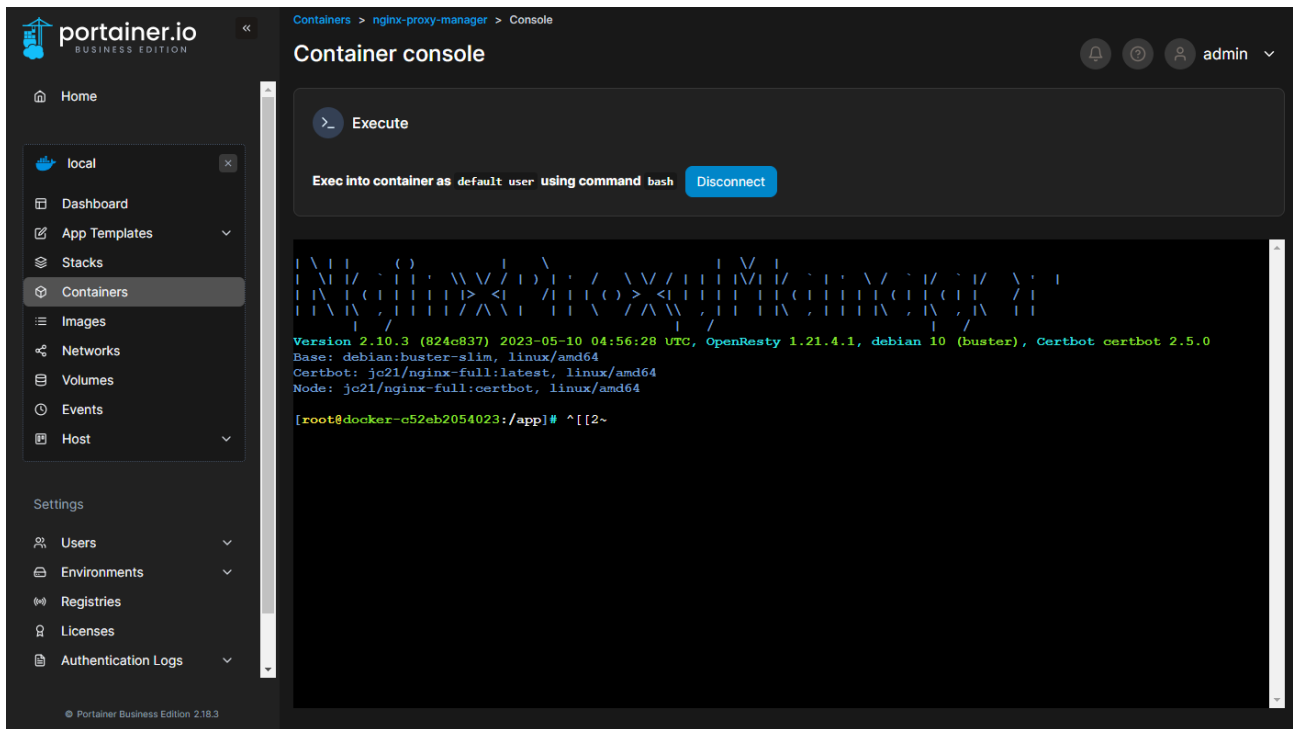

Docker를 Web Base GUI 환경으로 아주 쉽게 사용할 수 있게 해주는 Docker 유저에게는 필수 Docker 관리툴입니다.

The screenshot displays the Portainer.io Business Edition web interface. On the left is a dark sidebar with navigation links: Home, local (selected), Dashboard, App Templates, Stacks, Containers (highlighted), Images, Networks, Volumes, Events, Host, Settings, Users, Environments, Registries, Licenses, and Authentication Logs. The main area is titled 'Containers' and 'Container list'. It features a search bar, a toolbar with actions like Start, Stop, Kill, Restart, Pause, Resume, and Remove, and a '+ Add container' button. Below is a table of containers:

Name	State	Quick Actions	Stack	Image	Created	IP Address
svenihoney-wetty	running	[Icons]	-	svenihoney/wetty:latest	2023-03-16 17:50:44	172.17.0.6
data_watchtower_1	running	[Icons]	data	containrrr/watchtower	2023-03-16 17:56:54	172.19.0.5
vaultwarden-server	healthy	[Icons]	-	vaultwarden/server:latest	2023-04-04 00:03:04	172.17.0.5
data_transmission-openvpn_1	healthy	[Icons]	data	haugene/transmission-openvpn:latest	2023-04-17 18:20:40	172.19.0.2
portainer	running	[Icons]	-	portainer/portainer-ee:latest	2023-05-23 13:43:30	172.17.0.4
firefox	exited	[Icons]	-	jlesage/firefox	2023-05-28 08:23:35	-
nginx-proxy-manager	running	[Icons]	data	jc21/nginx-proxy-manager:latest	2023-05-28 11:42:31	172.19.0.4
redis	running	[Icons]	-	redis:latest	2023-06-15 10:09:13	172.17.0.2
grafana	running	[Icons]	-	alihazmy13/telegraf-influxdb-grafana:latest	2023-06-19 12:00:18	172.17.0.3
bookstack	running	[Icons]	data	lscr.io/linuxserver/bookstack	2023-06-20 17:12:52	172.19.0.3

At the bottom right, there is a pagination control showing 'Items per page: 10' and page numbers '1' and '2'.

🔄 버전 #2
